Transitioned to Assistant Dean of Admissions and Recruitment at USU, my alma mater

WRNMMC: Vice Chair of Credentials, 2023 – 2024

### **Candidate Statement:**

I am honored to be nominated to the BOD. My current projects include accessing the M2 database (military health records) to establish safety data on Dupixent in pregnancy and a second study intends to establish prevalence of ACD in the active-duty population. My passion and niche at WRNMMC is patch testing. I am excited to continue learning, contribute to the literature, and foster the next generation of patch testers locally and nationally!
